# 1. About US

The Ukrainian Climate Network (UCN) is an association comprising 35 non-governmental organizations (NGOs) working together to empower the rights of citizens to live in a safe environment because of the threat of global climate change.

## AREAS OF OUR ACTIVITY:

- ◆ We influence local climate policy
- ◆ We promote clean and renewable energy in the country
- ◆ We facilitate the adaptation of Ukrainian cities to climate change
- ◆ We develop climate education in Ukraine
- ◆ We monitor the national climate policy in the state
- ◆ We support the transition to mobile and «clean» transport

## 2. UCN organizations

There are 30 public organizations in the Network from all over the country who rallied to make our future better.

### **NGO «Economic Development Agency» – Voznesensk**

Monitoring and public expertise of the activities of public authorities and local governments. Solving the problems of democratization and protection of the rights and freedoms of citizens.

[www.aer.net.ua](http://www.aer.net.ua)

### **NGO “FORZA, Agency for sustainable development of the Carpathian region”**

Sustainable multifunctional forest management. Climate change mitigation and adaptation projects at the local and regional levels. Sustainable urban mobility.

[www.forza.org.ua](http://www.forza.org.ua)

### **Bureau of Environmental Investigations**

Investigation, legal assistance in the field of environmental rights protection. Information and analytical activities and assistance to the media.

[www.bei.org.ua](http://www.bei.org.ua)

### **World Wide Fund for Nature (WWF) in Ukraine – Kyiv**

Preservation of unique natural forest regions. Preservation of free-flowing natural rivers, restoration of wetlands. Environmental education.

[www.panda.org](http://www.panda.org)

### **Black Sea Women's Club – Odessa**

Adaptation to climate change, protection of water resources in the drainage basins of rivers flowing into the Black Sea. Sustainable development of the Black Sea region.

[www.bswc.org](http://www.bswc.org)

**NGO "Zero Waste Society" – Kyiv**

Promotion of responsible consumption, dissemination of information about the Zero Waste philosophy.

**zw.society@gmail.com**

**NGO «Kryvyi Rih City Human Rights Society» – Kryvyi Rih**

Ecological education. Environmental policy analysis.

**fedoryn@gmail.com**

**NGO «Ecosphere» – Uzhgorod**

Ecological education and upbringing of schoolchildren, development of green journalism, youth programs and international youth exchange programs.

**ekospha@hotmail.com**

**Public city organization «Eco-right-Kharkiv» – Kharkiv**

Advocating for legislation and laws in the field of ecology. Supporting environmental initiatives.

**eco@ecopravo.kharkov.ua**

**Public organization «Ecosense» – Zaporizhzhia**

Educational and informational work on local and global environmental issues. Organization of educational activities for schoolchildren and students.

**www.portmone.name**

**Public organization «Dzyga» – Zaporizhzhia**

Involving people in environmental proactivity, solving the problem of air pollution.

**dzigazp@gmail.com**

**«Ecoclub» – Rivne**

Improving energy efficiency of public institutions and private households. Enhancing local and national energy policies.

**www.ecoclubrivne.org**

**Children's independent eco-center «Romantyk» – Sumy**  
Environmental education. Advising kindergarten teachers, school teachers, teachers of lyceums, colleges, leaders of youth organizations.  
**centr.romantic@gmail.com**

**Eremurus Ecological Club – Kyiv**  
Promoting sustainable development of Ukraine. Creating awareness and increasing the ecological knowledge level among the general population.  
**www.eremurus.info**

**Green World Environmental and Humanitarian Association – Chortkiv**  
Combating climate change. Ecological safety and environmental law. Reserved management and studies.  
**www.greenworld.in.ua**

**Expert Advisory Center «Legal Analytics» (EACLA)**  
Protection of human rights, public interests, and other fundamental freedoms. Promotion of environmental protection and consumer rights protection. Civil society development.  
**www.legalanalytics.com.ua**

**Children's Ecological Association «Green Country» – Horlivka**  
Coordination of effort of adults, children and teenagers in environmental protection, environmental education, study and restoration of the natural environment.  
**green\_land.zk@mail.ru**

**NGO Unique Planet – Kyiv**  
Implementation of ethical attitude to animals, responsible and respectful attitude to the environment and biodiversity of the planet.  
**www.hutrooff.org**

**Ukrainian Youth Climate Association – Kyiv**

Development of the Ukrainian climatic youth movement.  
Propaganda of «green» energy. Combating climate change.  
[www.go-umka.org](http://www.go-umka.org)

**Ukrainian Ecological Club «Green Wave»**

Education for sustainable development. Ecological component of corporate social responsibility. Biodiversity conservation. Climate change adaptation and mitigation  
[www.ecoclubua.com](http://www.ecoclubua.com)

**Khmelnytskyi Regional organization of the Ukrainian Society for Nature Protection – Khmelnytskyi**

Protection of environmental rights of citizens. Environmental protection. Educational activities in sustainable development.  
[ekolife@mail.ru](mailto:ekolife@mail.ru)

**NGO “Khmelnytskyi Youth Development Club” – Khmelnytskyi**

Youth policy. Non-formal education. Combating climate change and monitoring local climate policy.  
[www.molodemisto.in.ua](http://www.molodemisto.in.ua)

**Center for Environmental Initiatives «Ecodia» – Kyiv**

Energy: renewable energy sources, energy efficiency, phasing out nuclear power industry. Climate change: national policy monitoring and urban adaptation.  
[www.ecoaction.org.ua](http://www.ecoaction.org.ua)

**NGO U-Cycle – Kyiv**

Development of bicycle network and bicycle infrastructure in Kyiv. Promotion of bicycle transport. Development of cycling tourism, training and consulting.  
[www.avk.org.ua](http://www.avk.org.ua)

### **Public and ecological youth organization «Our home Manyava»**

Informing local communities about climate change, sustainable use of energy resources, implementation of energy saving and energy efficiency measures.

**[www.manyava.ucoz.ua](http://www.manyava.ucoz.ua)**

### **National Ecological Center of Ukraine (NECU) – Kyiv**

Conservation of biodiversity and healthy environment, ensuring a quality living environment in Ukraine, formation of ecologically conscious civil society, European integration of Ukraine in the field of environmental protection, implementation of the principles of eco-imperative and ecosystem approach.

**[www.necu.org.ua](http://www.necu.org.ua)**

### **Civic Network OPORA – Kyiv**

Public control and advocacy in the field of elections, parliamentarism, education, management of common property. Energy efficiency and transparency of local self-government.

**[www.oporaua.org](http://www.oporaua.org)**

### **«Voice of Nature» – Kamianske**

Promoting the adaptation of Ukrainian cities to climate change. Development of environmental education in the region. Rational use of nature.

**[www.voice.dp.ua](http://www.voice.dp.ua)**

### **International Charitable Organization**

#### **«Environment People Law (EPL)»**

Providing legal advice to citizens and organizations in the environmental protection and environmental rights fields. Resistance to climate change.

**[www.epl.org.ua](http://www.epl.org.ua)**

### **NGO «Board of environmental education «Sweetosvit» – Kyiv**

Development and integration of environmental education in Ukraine. Introduction of innovative, continuous, integrated and inclusive education.

**[www.sweetosvit.org.ua](http://www.sweetosvit.org.ua)**

**NGO «Ekoltava» – Poltava**

Implementation of environmental solutions in communities, rational waste management and its minimization, adaptation to climate change, environmental education, organizational development.

**[www.ecoltava.org](http://www.ecoltava.org)**

**«Center for International Cooperation and project implementation» – Kyiv**

Stimulation of energy saving measures and energy efficiency in various fields.

**[icpi.center@gmail.com](mailto:icpi.center@gmail.com)**

**NGO Plato – Lviv**

Making climate change a priority of Lviv's urban policies and increasing the community's climate consciousness through advocacy and education.

**[www.plato.lviv.ua](http://www.plato.lviv.ua)**

### 3. Composition of the board of the Ukrainian Climate Network-2020

Executive and coordination functions of the UCN are performed by the chairman, who is elected every 2 years. The UCN is governed by a general meeting of member organizations. Decisions are taken by majority of votes provided there is the quorum.

Oksana Mariuk –  
A Chairman of the  
UCN Council, A Legal  
Advisor of the NGO  
Ecoclub

Margarita Mostova –  
A UCN Advisor,  
A Project Coordinator  
of the NGO Ekoltava

Yevhen Kolishevskyi –  
A UCN Advisor,  
A Director of the NGO  
Voice of Nature

Olha Boiko –  
A UCN Advisor, An Expert  
of the Climate department  
at the NGO Ecoaction

Olga Fursik –  
A UKM Adviser,  
A Head of the Ukrainian  
Youth Climate Association

#### COMPOSITION OF THE BOARD OF THE UCN IN 2019

Iliia Yeremenko – A Chairman of the UCN Council, A Project Coordinator of the NGO Ecoclub  
Yulia Pashkovska – A UCN Advisor, A Chairman of the Board of the NGO Ekoltava  
Yevhen Kolishevskyi – A UCN Advisor, A Director of the NGO Voice of Nature  
Olha Boiko – A UCN Advisor, An Expert of the Climate department at the NGO Ecoaction

## 4. Strategy for 2021-2025

Executive and coordination functions of the network are performed by the chairman, who is elected every 2 years. The network is governed by a general meeting of member organizations. Decisions are taken by a majority of votes with a quorum.

National  
climate  
policy

Local  
climate  
policy

Organizational  
development  
of the UCN

The participation  
of the UCN in inter-  
national climate and  
relevant processes

Climate education  
and awareness

## 5. Joint work of the UCN

In May 2019, the UCN held the «Urban Energy Transition Workshop» in Vinnytsia, which was attended by 29 participants from different cities.

In September 2019, all UCN organizations actively joined the International Climate March #GlobalClimateStrike in front of the office of the President of Ukraine. The International Climate March brought together more than 2,000 Ukrainians from 21 cities to Kyiv. They walked on the streets of the capital and demanded that the President, the Government and the newly created Ministry of Energy and Environmental Protection took several decisive actions to address the biggest environmental threats Ukraine faced, including climate change, energy industry, livestock industry, transport and waste.

In November 2019, in Lviv, the Ukrainian Climate Network and 350.org held the first National Climate Ambitions Forum, supported by the Heinrich Boell Foundation Kyiv Office Ukraine, the PROMIS Project and the Federation of Canadian Municipalities, held the first National Climate Ambitions Forum. The event brought together more than 200 participants from 48 cities, towns and villages, becoming the first climate event of this

scale being organized in Ukraine. As a result of the forum, 21 cities signed the Declaration of the Forum, thus confirming the recognition of the world's climate emergency state and supporting the goal of the Paris Agreement.

Additionally, in November, the UCN conducted the «Adapt the city to climate change» training in Kyiv. The event was attended by about 40 participants from different cities of Ukraine comprising representatives of local governments and activists cooperating with the authorities as regards the adaptation to climate change.

### **WORK WITH CENTRAL EXECUTIVE BODIES OF UKRAINE (CEBs)**

Representatives of the UCN presented the stance of the organization in the working group engaged into the development of Ukraine's second nationally determined contribution to the Paris Agreement.

Proposals for modeling the low-carbon scenario were submitted as part of the development of Ukraine's second nationally determined contribution to the Paris Agreement.

Since November 2020, the representatives of 6 organizations of the UCN have been actively engaged in the activities of the working group to develop the National Strategy for Adaptation to Climate Change.

## DEVELOPED DOCUMENTS

- ◆ Regarding the violation of the strategic environmental assessment procedure during the preparation of amendments to the National Plan for Reduction of Emissions of Large Combustion Plants
- ◆ Regarding the Assessment Report of Environmental Impact of the construction of the power units № 3, 4 of the Khmelnytskyi NPP
- ◆ Regarding the need to send an official delegation from Ukraine to the United Nations Climate Change Summit on September 23, 2019
- ◆ Regarding the energy efficiency requirements in public procurement
- ◆ Appeal against the changes of the state budget of Ukraine involving the reduction of the expenses on environmental measures and energy efficiency
- ◆ Comments on the Economic Stimulus Program for Overcoming the Consequences of the COVID-19 Epidemic
- ◆ Public position on the approval of the NDC in Ukraine
- ◆ Regarding the establishment of the Decarbonization Fund
- ◆ Appeal on the need for the Green Course for Ukraine
- ◆ Comments on the structure of Ukraine's Climate Change Adaptation Strategy until 2020

## 6. Research into the impact of climate change on communities

In 2020, a nationwide sociological survey «Climate Change and Climate Adaptation» was held. The survey was organized online throughout the country, including the Autonomous Republic of Crimea, Luhansk and Donetsk regions. The offline survey was organized jointly by the members of the UCN (NGO “Our home – Maniava”, NGO “Ekoltava”, NGO “Ecosense”, NGO “Voice of Nature», NGO “UMKA”) in Kyiv, and Poltava, Zaporizhzhia, Dnipropetrovsk, Ivano-Frankivsk and Rivne regions. Other UCN organizations also participated in completing and distributing the questionnaire, which allowed for collaborating to achieve the project’s goals.

2211 respondents from all over Ukraine took part in the survey.

The aim of the research was to estimate the vulnerability to climate change of the residents of different regions in order to advocate for the development of relevant policies by local authorities and the state to overcome the effects of climate change and adaptation.

**The survey was created based on seven indicators considered for estimating the vulnerability of a settlement to climate change:**

- ◆ vulnerability to flooding
- ◆ vulnerability to heat stress
- ◆ vulnerability of green areas
- ◆ vulnerability to natural meteorological phenomena
- ◆ vulnerability to deterioration and depletion of drinking water
- ◆ vulnerability to infectious diseases and allergies
- ◆ vulnerability of energy systems

You can learn more about the main conclusions and research methodology on the [UCN website](#).

## 7. The main achievements of the UCN organizations

### SUSTAINABLE ENERGY

**NGO Ecoclub** has been working on the «Communities promote sustainable energy solutions (CASES)» project. As a result, Voznesensk and Baranivka ATCs have gained support and co-financing for the

implementation of their projects. A 50-kW solar power plant was opened in Voznesensk to meet the electricity needs of Voznesensk Water Supply Company.

In Baranivka, the roof of the interschool resource center has been repaired and a 10 kW solar power plant has been installed. The energy efficiency center has also been established.

Ecoclub has also launched an online course for communities named «Local energy projects: how and where small businesses and ATCs can find money for energy projects and more.»

Its purpose is to teach fundraising, strategic planning and cooperation of government, business and the public for the implementation of energy projects.

In 2019, **NGO Ecoaction** together with the Energy Transition coalition collected almost 14,000 signatures on the petition for the transition to renewable energy sources by 2050 and handed them over to government officials.

Ecoaction carried out a sociological research

into the attitude of residents of coal cities of Donbass to the prospect of mines closure and fair transformation of the region.

Environmental and humanitarian association **Green World** has organized a series of educational trips to Skala, Zalishchyky, Chortkiv, Terebovlia, Zbarazh as part of an information campaign to promote the transition to renewable energy sources.

In 2019, **Khmelnyskyi Energy Cluster** together with the NGO Ecoclub implemented the project «Synergy of public, government and business actions in the format of an energy cluster for energy reform of Khmelnytskyi region»

Analyzed the potential of renewable energy sources in Khmelnytsky region.

In 2019, the organizations realized the «**Energo-Rupor**» project, the «Activate Energy» informational and educational campaign and the «Khmelnyskyi NPP: threat or opportunity» hackathon.

In 2020, the project «Climatic goals of the cities of Khmelnytskyi region» was implemented.

NGO **Our home Maniava** implemented a project to improve energy efficiency of the preschool «Sonechko» in the village of Verkhovyna, Ivano-Frankivsk region.

Within the project «Revolving Fund: Partnership for Energy Efficiency» NGO **Economic Development Agency** has created a regional revolving fund in 6 communities of Mykolaiv and Odessa regions.

## ADAPTATION TO CLIMATE CHANGE

**NGO Plateau** held the «Safari for Communities» activity in Lviv to find nature-oriented solutions to such urban problems as deteriorating air quality, irrational use of rainwater, improper treatment of organic residues, and the effect of «urban heat island» among others. In the context of the project, the first bot-hunter for urban problems @Safari\_Community\_bot was created.

**NGO Plateau** has created the first public rain garden in Ukraine.

**NGO Green World** organized an advocacy campaign named

«Monastery Gallows» advocating for the systematic care for trees in the city of Chortkiv.

**NGO Environment. People. Law.** carried out a study «Protection of swamps. Experience of Europe and Belarus. Lessons and recommendations for Ukraine».

As part of the Ucan Ukraine project, **NGO Dzyga** organized an information campaign and offered support of eco-ideas for small businesses in 4 cities.

**WWF** has refined and improved the «Water Risk Filter» online resource. This innovative tool can provide an appropriate response on water risks: from acute water scarcity and devastating floods to exacerbation of social tensions and weak regulatory frameworks of countries.

**The NGO Voice of Nature NGO** held the «Climate Adaptation: Challenges and Prospects at the National, Regional and Local Levels» Ukrainian-German conference in Dnipro and Kamianske.

## CLIMATE EDUCATION

**NGOs Ekoltava, 350.org-Ukraine and Ecoclub** held an educational camp for environmental activists called «Green Camp».

**Eco-club Eremurus** held the nationwide competition «Energy and Environment».

The board of environmental education **Sweet Osvit** and NGO Ecoaction conducted trainings on renewable energy for middle and high school students.

NGO **Ecosphere** organized Green Schools as part of their work with young people. You can learn more about one of them here.

Ukrainian ecological club **Green Wave** organized a few environmental games: 29th nationwide campaign-hike «Cossack Ways» in Vyhraiv village, a public event «My clean community», summer camps. They also prepared the analytical reviews named «Environmental education for sustainable development on climate change in preschool, secondary, extracurricular and higher education in Ukraine» analytical review and «The challenges of university education on climate change: talks at COP 25» review.

**NGO Ecosense** organized an informational and educational campaign «Zaporizhzhia for clean energy» to promote renewable energy sources and promote the transition to 100% renewable energy sources (RES).

## CLIMATE POLICY

**NGO Ecoaction** has developed «A roadmap of Ukraine's climate goals until 2030». The document sets targets aimed at the reduction of greenhouse gas emissions for those sectors that have the greatest impact on climate change: energy, buildings, transport, waste and the combined sector of agriculture, forestry and land use.

**NGO Ekoltava** conducted a research «Climate (In) Justice: The Impact of Climate Change on Vulnerable Social Groups in Ukrainian Cities», analyzing the city's infrastructure (housing and municipal infrastructure, employment, transport and mobility, public spaces, medicine). They also developed several recommendations for city administrations, public organizations that care for socially vulnerable groups and charity organizations.

**NGO Ekoltava** led an information campaign «Strengthening of civil society in the implementation of national climate policy» in Poltava. The purpose was to promote the inclusion of climate programs in the pre-election campaign of candidates with their further implementation, after the election of the current city administration.

**NGO Plateau** conducted a research «Climate goals of Lviv» (a guide for those who have been elected to the city council).

**NGO Economic Development Agency** together with the representatives of local authorities of Buzk, Prybuzhanivsk and Oleksandrivsk ATCs implemented the project «Increasing the local climate ambitions of the communities in Mykolayiv region».

As part of the project «Climate Targets of 2030 for Zaporizhia» project **NGO Ecosense** advocated the adoption of «Zaporizhia Climate Change Adaptation Plan» and prepared an educational information brochure for the local government named «Vulnerability to Climate Change and Climate Targets in Zaporizhia and the Region».

## TRANSPORT

**NGO Plato** has developed a series of educational videos on sustainable mobility in Lviv.

**NGO U-Cycle** together with the Ukrainian Bicycle Network started the development of the National Bicycle Strategy with the Ministry of Infrastructure of Ukraine. They also presented the research «The need for the development of cycling transport and obstacles to its implementation in cities and regions of Ukraine» research.

Moreover, they conducted the National Public Campaign «I AM FOR VELO» for the local elections of 2020 in 26 cities and ATCs in Ukraine.

In 2020, the **U-Cycle** team developed 5 cycling frameworks for Sloviansk, Melitopol, Kherson, Berdiansk and Opishnia ATCs. Today, more than 30 Ukrainian cities and communities have approved cycling frameworks, more than 20 of which have been developed by U-Cycle experts since 2014.

**NGO Forza** has launched the project «SUMCITYNET: Cities for Accessibility and Climate-Sustainable Urban Mobility» project, which aims to address the challenges faced by modern cities: congestion, harmful emissions, limited urban accessibility for cyclists, the elderly and people with disabilities.

## WASTE

**NGO Ekoltava** advocated for the adoption of a municipal solid waste management program in Poltava.

**NGO Zero Waste Lviv** held an educational campaign «Without polyethylene» in retail chains in Lviv involving ten of them. The campaign reached the national level and was supported by the Ministry of Ecology and Natural Resources, as well as the United Nations Development Program in Ukraine.

In addition, Zero Waste Lviv implemented a socio-cultural project «Composters for housing cooperatives». Composters have been installed on the territory of 4 housing cooperatives in Lviv to raise public awareness of composting and waste sorting. Public organizations and housing cooperatives from Uzhhorod, Boryslav, Drohobych and other Ukrainian cities benefited from the project.

Furthermore, they coordinated the international campaign «Environ Menstrual Week» in Ukraine to encourage the use of reusable menstrual hygiene products and to draw attention to health damage, costs, environmental pollution caused by the use of disposable menstrual products.

NGOs **Zero Waste Lviv** and **Ekoltava**, in partnership with the «Fama» Research Agency, conducted the «The research of new environmental impacts in the context of the COVID-19 pandemic situation in Ukraine».

**NGO Environment. People. Law.** carried out the research «The concept of «zero waste» – from theory to practice» research and published the handbook «The European best practices of waste management».

These two manuals are intended for the public and will assist in the implementation of environmentally friendly solutions in the field of waste management by local governments and executives.

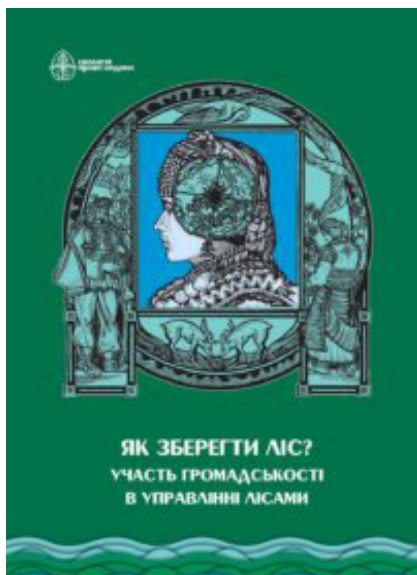

## BIODIVERSITY

WWF has published the annual research «Wildlife Study on global biodiversity and global health trends»

NGO **Kryvyi Rih Human Rights So-**

**ciety** has been conducting long-term monitoring of compliance with the protection status of the landscape reserve of national importance «North Red Beam».

**NGO Environment. People. Law.** created “The «Nature Reserve Fund: Green Treasury of the Community» manual, dedicated to the responsibilities of ATCs and local governments as regards the management of the land use and protection. The manual reveals the aspects of achieving sustainable ecosystems and improving the quality of life of communities through proper organization of protection of particularly valuable reserved areas.

The manual «How to save the forest? Public participation in forest management” is written to help all, who care about the preservation of Ukrainian forests and want to know more about how to get involved. The manual has an applied direction and consists of a theoretical and practical part, contains an overview of the current picture of forestry in Ukraine and our vision of where we should aim in the future. Much of the information provided in the handbook is based on the experience of other countries.

The manual “Land Management: Environmental and Legal Aspect” is devoted to management issues in the field of land use and protection, including land use planning, land management, land use and protection, land monitoring, etc. through the prism of environmental safety. In addition to the theoretical part, the manual contains an analysis of case law and recommendations.

## 8. COP 25

Due to the UN international climate talks held in Madrid in December 2019 involving 196 countries, the Ukrainian Climate Network published the position of 33 environmental organizations on the Ukrainian climate change policy.

«Climate negotiations are becoming a platform for cooperation not only between governments, but also businesses, financial institutions and cities... Governments should aim to achieve climate neutrality... At this point, cities can do it faster and adopt local low-carbon development strategies. Today, nobody questions the possibility of countries and cities switching to renewable energy. Cities need to take this process into their own hands» stressed the position of the public at the discussion, the ex-head of the Ukrainian Climate Network Ilya Yeremenko highlighted.

«Climate negotiations are becoming a platform for cooperation not only between governments, but also businesses, financial institutions and cities... Governments should aim to achieve climate neutrality ... At this point, cities can do it faster and adopt local low-carbon development strategies. Today, no one questions the possibility of countries and cities to switch to renewable energy. Cities need to take this process into their own hands», – Ilya Eremenko, ex-head of the Ukrainian Climate Network, said the position of the public in the discussion of the negotiations.
